

Tropical Legumes and Gender

Ensure legume seed systems are gender sensitive

In Ethiopia, ACOS seed company offers childcare for their women workers. Well-being and productivity of chickpea and bean value chains are improved.

Tropical Legume tested & promoted innovative ways to tackle gender inequality issues in legume value chains, e.g. small seed packs to improve seed access, support women seed entrepreneurs...

“ I used to plant the local variety Red Beauty on my 5-acre farm but the rosette disease wrecked my harvest. I tried the new rosette-resistant Serenut 5R & 9 varieties and I was impressed. Now I can feed and support my children and extended family. ”

Mrs Leonora Okidi
Groundnut farmer, Pader district, Uganda.
